KMI-Experiment Seminar

Tau LFV and stau LFV

北野 龍一郎 氏 (東北大学大学院理学研究科)

2011年 7月26日 (火) 15時 ~ KMI 理学シンポジア (ES635)

abstract:

Lepton flavor violation (LFV) is a very clear signal for physics beyond the standard model. I will discuss what one can learn from the LFV processes. I also present a new search for LFV at the LHC in the long-lived stau scenario.
