## “Analytic methods in open string field theory: an overview”

**Yuji Okawa**  
(The University of Tokyo)

**Wednesday, Dec. 19, 2012 17:00-  
KMI Science Symposia (ES635)**

### Abstract:

There have been impressive developments in the research on open string field theory since the construction of an analytic solution by Schnabl in 2005.

In this colloquium I give an overview of the current status of the research and discuss its possible future directions.
